## CT activates a Business Continuity Plan with health and safety measures for its employees

For more than 30 years, CT, a leader in providing technological and innovative engineering solutions for the entire product life cycle, has been placing people at the heart of its activity by taking many actions to ensure their wellbeing, with a special focus on helping employees balance their work and personal lives, providing professional training and developing personalized career planning, among others. In the current situation, the company is reinforcing its commitment to its employees and stakeholders by activating a set of flexible measures to protect their health and safety, within its Business Continuity Plan.

In addition to the efficient implementation of massive teleworking at the start of the crisis, CT has strengthened the safety measures for employees working in client facilities, with a large supply of personal protection equipment.

To continue effectively managing people and projects, the company has implemented tools such as MS SharePoint and Apps for its employees in Spain, France and Germany, which allows the situation of each person to be tracked in real time in every country and office. This information, which is continually updated, is displayed through two interactive dashboard (Health & Safety Metrics and Business Continuity Metrics) through Data Analytics (Qlik) so that it can be used by the companies 38 business managers.

### About CT

*CT provides engineering services in the aeronautical, naval, automotive, rail, energy, industrial plants, architecture and construction sectors. CT covers the entire life cycle of the products, from product design engineering, manufacturing engineering to post-sales support engineering. CT has more than 1,700 employees and a network of offices in Spain, France, Germany, Portugal, the United Kingdom, India and Brazil. CT is a supplier of engineering services in design, manufacturing, assembly and maintenance phases for the civil and military sector. CT is the only Spanish supplier of product engineering (E2S) and manufacturing (ME3S) for Airbus in the world and a preferred supplier of engineering for Navantia. Other relevant works stand out, such as the participation of the CT Architecture division in the La Sagrada Familia project or the Automotive Engineering division in the Medina-Mecca AVE.*
